

Misha Punj

Software Developer (.NET)

Oakville, ON | itsmisha101@gmail.com | mishapunj.com | linkedin.com/in/misha-punj | github.com/itsMishh

Summary

Software Developer with 1.5+ years of professional experience building enterprise applications using C#, .NET, ASP.NET MVC, REST APIs and Microsoft SQL Server in an Agile environment. Experienced in end-to-end feature delivery, API integrations with financial and accounting platforms, legacy application modernization, production support and incident resolution, and SQL Server development. Hands-on experience with Azure DevOps Server (TFS), Git, GitFlow, NuGet, unit testing and GenAI tools including GitHub Copilot.

Technical Skills

- **Languages:** C#, SQL (T-SQL)
- **Frameworks & APIs:** .NET, ASP.NET MVC, REST APIs, Web Services
- **Databases:** Microsoft SQL Server, T-SQL, Stored Procedures, Relational Database Design
- **DevOps & Version Control:** Azure DevOps Server (TFS), Git, GitFlow, NuGet, Microsoft Azure
- **Testing & Tools:** Unit Testing, Debugging, Root Cause Analysis, OpenAI Codex, GitHub Copilot
- **Development Practices:** Agile/Scrum, SDLC, Clean Architecture, Software Design, Requirements Gathering, Technical Documentation, Production Support
- **Foundations:** Data Structures, Algorithms, Linux

Experience

Software Developer | IIMSWISS Corp. | Toronto, ON | Jun 2025 – Present

- Develop and maintain enterprise applications using **C#, .NET, ASP.NET MVC** and **Microsoft SQL Server**, delivering features end to end from requirements gathering through development, testing and production release.
- Design and develop **REST APIs** and third-party integrations connecting internal enterprise systems with external financial and accounting platforms.
- Modernize and enhance legacy applications using clean architecture and software design principles to improve maintainability, scalability and reduce technical debt.
- Perform production support, incident analysis and troubleshooting, identifying root causes across application code, APIs and SQL Server data.
- Develop, optimize and maintain SQL Server queries, stored procedures and relational database components to support application functionality and performance.
- Write unit tests and use GenAI tools such as GitHub Copilot to support code quality and development speed
- Collaborate in an Agile/Scrum development environment using Azure DevOps Server (TFS), Git and GitFlow, including pull requests and code reviews.
- Create and maintain technical documentation for application features, APIs, integrations and implementation processes.

Education

Diploma, Computer Programming | Sheridan College, Oakville | Dec 2024

Relevant coursework: Data Structures, Algorithms, Linux, Computer Math Fundamentals, Art of Technical Communication, Computer and Network Security, Cloud Enabled Networks

Certifications & Leadership

- **Introduction to Cybersecurity**, Cisco | 2023
- **Core Team Member**, Google Developer Student Club (GDSC), Sheridan College | Sep 2023 – Oct 2024
